Directions
Call 877-FLY-THIS for help! Our Hang Gliding lessons are conducted at our training facility on Hatteras Ridge State Park located at Mile Post 12 on the 10000 side of Highway 128 on Hatteras Ridge. NC. The dunes of Hatteras Ridge provide the perfect platform for learning to Hang Glide. They have plenty of height for beginners, and are safe for landing. Through special arrangement with the State Park Service, we are allowed to conduct Hang Gliding Lessons from these dunes. We have been providing lessons at this site for over 25 years.

What to Bring
Be sure to dress appropriately for the weather and weather forecast. Bring water and sunscreen. Shoes are recommended for the dunes.

Additional Activities
Based on your reservation, we are interested in trying a kitesurfing lesson. Our fun, fast-track online reservations are available for you to book your kitesurfing lesson. Online Reservation Solutions (ORS)

News: Affordable reservation system now available

Outbound's Reservation System has been built with the diverse needs of your business in mind and understands that a system that handles 80% of your needs is simply not good enough. We pride ourselves on getting "down and dirty" with the details of how your reservation process works so that your business will grow with your investment.

How ORS Can Help Your Business:

1. Customer Online Reservations

Allow your customers the freedom of checking availability and reserving your activities online. Outbound Software's graphical activity index screens and intuitive reservation process make finding an activity and making a reservation a snap!

2. Phone Reservations

Enhance the speed and customer service of your employees as they take phone reservations. The reservation console builds on the power of the consumer interface to include customer/reservation lookup, expanded activity availability screens, shortcut reservations and enhanced basket handling.

3. Walk-in Reservations

Give your onsite reservationists the same ease, power and flexibility as a call center representative. Outbound Software allows connectivity into Point of Sale systems such that you can reserve an activity and then charge them on the Point of Sale along with other items (admission tickets, retail goods, etc).

Common Questions:

*** Is it easy to setup?** Sure is! We take care of all of the details for you. All you need is a computer with a good internet connection. We can also process credit cards from your customers online.

*** How much is it?** We offer 3 levels (bronze, silver and gold) of affordable usage depending on your business needs. Contact us for features and pricing.

Test Drive Today! Jump online to one of our demonstration sites to view the customer reservation process in action: www.outboundsoftware.com/demosites and click on the link that most matches your business.

Testimonial

"Being the first to implement an online reservations system for our outdoor activities on the Outer Banks of North Carolina has set Kitty Hawk Kites apart from the competition. Our customer satisfaction has increased while allowing us to decrease our administrative costs involved with our call center. Outbound Software's Online Reservation System has adapted to our diverse reservations needs and we give them our highest recommendation."

- John Harris, President of Kitty Hawk Kites
